# BID, OFFER OR PROPOSAL FOR SALE OR LEASE OF MATERIALS

(Defined at I.C. 36-1-2-9.5)
(Please type or print)

Date: February 22, 1990

1. Governmental Unit: City of Fort Wayne
2. County: Allen County
3. Bidder (Firm): Deeds Equipment Company, Inc.
   Address: 8015 E. 45th St., P.O. Box 26036
   City/State: ~~Lawrence, Indiana 46226~~
4. Telephone Number: 219-784-2500:800-234-6548:800-841-4028
5. Agent of Bidder (If applicable): Daniel A. Brennan, Vice President

Pursuant to notices given, the undersigned offers bid(s) to City of Fort Wayne (Governmental Unit) in accordance with the following attachment(s) which specify the class or item number or description, quantity, unit, unit price and total amount.

The contract will be awarded by classes or items, in accordance with specifications. Any changes or alterations in the items specified will render such bid void as to that class or item. Bidder promises that he has not offered nor received a less price than the price stated in his bid for the materials included in said bid. Bidder further agrees that he will not withdraw his bid from the office in which it is filed. A certified check or bond shall be filed with each bid if required, and liability for breach shall be enforceable upon the contract, the bond or certified check or both as the case may be.

## SPECIFICATIONS
## 15 YARD CATCH BASIN CLEANER

The machine shall be of the dual engine design to be used for removing sand, stones, bottles, cans, grease, sludge and other debris from sanitary sewer and/or storm drain catch basin.

The machine shall include an air conveying vacuum system, powered by an auxiliary diesel engine, to provide for the removal of debris from sumps, digestors, wet wells, bar screens, etc.

The machine shall also include an enclosed and sealed body for storage of the collected debris.

In order to avoid experimental, untried equipment, no unit will be accepted without meeting the criteria below: It is the intent that this unit will have an anticipated life of over ten years. The following general questions should be answered by the manufacturer. Only bids from manufacturers who have experience in manufacturing catch basin cleaners will be considered.

How long has manufacturer been in the business of manufacturing catch basin cleaners?

25 Yrs.

Is unit bid a current production model?

X Yes ___ No

Bidder has enclosed manufacture's literature, specifications and all pertinent information concerning this bid?

X Yes ___ No

Bidder proposal was filled out thoroughly and all pertinent information requested was provided and any deviations thoroughly explained?

X Yes ___ No

Truck will be provided by City of Fort Wayne, W.P.C.M.D. Cost of lengthening or shortening the frame will be included in the bid cost. Truck may be inspected at W.P.C.M.D. located at 503. E. Wallace Street.

W.P.C.M.D.
CITY OF FORT WAYNE

## GENERAL PROVISIONS AND REQUIREMENTS

1. Demonstration of the Equipment

   The W.P.C.M.D. requires each supplier demonstrate the equipment they shall supply prior to bid opening. Failure to demonstrate said equipment shall be cause for disqualification of the proposal.

2. Patent Indemnification

   The supplier shall indemnify and save harmless the W.P.C.M.D., City Utilities and City of Fort Wayne, and all City Utilities/ Civil City personnel from all suits and actions of every nature and description brought against them or any of them, for or on account of the use of patented appliances, products or processes, and it shall pay all royalties and charges which are legal and equitable. Evidence of such payment or satisfaction shall be submitted upon request of the W.P.C.M.D., City Utilities and/or the City of Fort Wayne as a necessary requirement in connection with final execution of any contract in which such patented appliances, products or processes are used.

REFERENCE WITHIN THE SPECS TO A BRAND NAME OR MANUFACTURER'S NAME OR SPECS ARE FOR REFERENCE ONLY, AND MAY BE SUPPLIED WITH AN APPROVED SUBSTITUTE OR EQUAL OR BETTER QUALITY.

Information to be furnished by Supplier (See enclosed pages)

Each supplier shall furnish the following information with its proposal: (Please check each item to indicate compliance)

| | | |
|---|---|---|
| A. | Bid Price Page | yes___ |
| B. | Detailed Component List Including Spare Parts | yes___ |
| C. | Complete System Specifications | yes___ |
| D. | Literature describing all major components in detail to include all optional equipment | yes___ |
| E. | Photographs of a complete unit identical to the one to be supplied | yes___ |

W.P.C.M.D.
CITY OF FORT WAYNE

F. Compliance to the specifications shall be answered by a yes or no, and deviations and/or exceptions shall be clearly indicated on an attached sheet and referenced by component to aid in proper evaluation — yes

G. Supply full details outlining warranty

H. Each bidder shall furnish with the bid document a statement from a certified surety company that they shall be prepared to furnish a 100% Performance Bond within 10- days after notification of the award. The Performance Bond shall be forfeited in the event the equipment is not delivered as specified or in the event it does not operate in accordance with the sepcifications.

yes

I. Supply full details outlining service policy including factory parts and availability of full-time staff (Technical, Order/ Shipping) — yes

J. Certificate of Insurance

The successful bidder shall supply a minimum of $1,000,000 of Bodily Injury and Property Damage Insurance, including but not limited to a Broad Form Liability Endorsement and Products and Completed Operations coverage. A Certificate of Insurance showing the $1,000.000 coverage shall be provided with the bid. Failure to supply the certificate of insurance shall be considered sufficient cause for rejecting the bid.

yes

## * * * * * D E V I A T I O N S * * * * *

Bidder shall itemize all deviations to the specifications here. If sufficient space has not been provided, attach additional sheets as required. A statement referring to manufacturer's literature or specifications without stating the actual deviation hereon shall be cause for disqualification. Unless otherwise stated by the bidder in the space below, the proposal shall be considered as being in strict accordance with the specifications outlined herein, even thought the manufacturers' literature indicated deviations from the specifications as outlined by the W.P.C.M.D., City Utilities, City of Fort Wayne. (NOTE: Deviations to specifications regarding optional items shall be listed last and on a separate sheet and in accordance with the stipulations stated above.)

W.P.C.M.D.
CITY OF FORT WAYNE

**DEVIATIONS**

**DEBRIS BODY**

The debris storage body shall be constructed of a minimum 3/16" corrosion and abrasion resistant steel with a minimum yield point of 50,000 PSI and a minimum tensile strength of 70,000 PSI — yes

The body shall be round for maximum strength and have a minimum usable liquid capacity of 14 cubic yards or 2,800 gallons. — yes

The body shall have a full size rear door that is hinged at the top and is equipped with a replaceable neoprene type seal to prevent leakage. This door shall be pneumatically opened and closed so operator is not subjected to sewage when dumping. Door shall have hydraulically locker devices. — yes

Debris body shall be dumped by raising the body to a 50 degree angle utilizing a forward mounted, double acting hydraulic dump cylinder. — yes

To achieve best possible material separation and minimize material being discharged to atmosphere, the centrifugal compressor shall draw air from 2 separate ports in the debris body. — yes

Dump controls and accessory controls shall be provided at a central curb-side location directly behind the cab of the truck. — yes

Debris body flusher system to remove solids from body — yes

**WATER TANKS**

Water tank must be a certified metered capacity of 500 gallons. Certification may be necessary upon delivery. — yes

W.P.C.M.D.
CITY OF FORT WAYNE

The water tank shall be manufactured from non-corrosive, aluminum to prevent rust, yet still provide for maximum strength (or equal.)

yes

The water tank shall be easily removed from the unit to provide complete access to the truck chassis for maintenance purposes.

yes

The water tank shall be adequately vented and connected to provide complete filling.

yes

The water tank shall be totally separate from the debris tanks and provide no structural support.

yes

The water tank shall share no common walls with the debris tanks to prevent corrosion.

yes

The water tank shall come equipped with and anti-syphon device and 25' of hydrant fill hose and fittings. A water level sight gauge shall also be provided.

yes

The water tank shall carry a 10 year warranty against corrosion or cracking.

yes

**DEVIATIONS**

**VACUUM SYSTEM**

Vacuum shall be created by a minimum 38" diameter tapered aluminum centrifugal compressor. The compressor shall be manufactured out of aluminum for operator safety with hard chrome plated cast aluminum radial blades.

yes

The aluminum centrifugal compressor shall be of the riveted type design, welded steel fans are not preferred due to safety considerations.

yes

The centrifugal compressor shall be capable of air flows from 0 to 8000 CFMs and pressures from 0 to 114" negative water pressure.

yes

The outer housing shall be manufactured out of a minimum 1/4" spun steel and carry a 5 year warranty.

yes

For cleaning of drying beds, vacuuming leaves and debris along curbs, unit shall have capability of maintaining a full, constant vacuum while unit is in motion.

Unit shall have ability to vacuum and jet rod to depths of 75 feet without use of any special attachments.

yes

Compressor shall be able to vacuum wet or dry material without damaging vacuum system. Compressor shall also carry an unconditional 5 year warranty on the centrifugal compressor.

yes

**VACUUM SYSTEM DRIVE**

The centrifugal compressor should be driven direct through a helical gear type step-up transmission drive with a step-up ratio of 1.4 to 1.

yes

The 2 gears shall be lubricated with a splash lubrication system. The gear drive should attach directly to rotor shaft without use of multiple stage v-belts, sheaves or jack shafts.

yes

The gear train should operate in an oil bath system at all times for added protection.

The compressor shall be engaged and disengaged from the auxiliary driving motor by a 10" heavy duty, industrial rated, over-center type clutch with ferramic drive plates.

**VACUUM SYSTEM DRIVE ENGINE**

The shrouded auxiliary engine used to drive the vacuum system shall be liquid cooled, diesel powered, turbo charged, 4 cylinder minimum, heavy duty industrial 4 cycle engine. The engine shall have a minimum displacement of 239 cubic inches and come equipped with high temperature, low oil pressure shutdown system as well as an exhaust silencer.

The auxiliary engine control panel shall be curb-side and located directly behind the cab and be no more than 5 feet off the ground. The control panel shall consist of the following; engine, ignition, tachometer, water temp gauge, oil pressure gauge, voltmeter, hour meter.

yes

The entire auxiliary vacuum engine shall be insulated in a noise deadening shroud to further decrease the operating noise level.

yes

The noise deadening engine shroud shall be on roller tracts allowing the shroud to easily be pulled away from the engine providing complete engine access.

yes

Heavy panels requiring manual removal shall not be acceptable.

yes

## 8 FOOT TELESCOPIC BOOM SPECIFICATIONS
## GENERAL SPECIFICATIONS

**DEVIATIONS**

**VACUUM SYSTEM PICK-UP HOSE**

Shall be designed for front-end operation with hose mounted and stored at front mounted work station. Front mounted location is desired for ease of positioning vacuum hose as well as minimizing need for operator to swing hose into traffic.

yes

All connections between debris body and vacuum system will be of the self-adjusting pressure fitting type.

yes

Vacuum hose will remain stationary and not raise with debris body in order to minimize possibility of running vacuum hose into power lines and low handing branches.

yes

The upper debris tube shall consist of an anchored steel tube and elbow for additional life. The lift and swing movements shall be accomplished by cylinder actuated means. Gear-type rotations are not preferred due to maintenance considerations.

yes

The boom shall be operated by an electric-over-hydraulic system which draws its power from the auxiliary engine's hydraulic power source.

yes

The boom shall be hydraulically driven up, down, left and right directions. Boom shall be controlled by a remote push button control station by cable to the hydraulic power swing and lift cylinders.

yes

The control station shall come equipped with control switches for all directions as well as a safety emergency shut down button which automatically eliminates power to the boom.

yes

A cab protection device independent of cab that will protect cab from boom will be provided.

yes

Pipe extensions will be included to allow operator to clean to depths of 20 feet. This will include a 6'6" catch basin nozzle with a steel reinforced tip. Pipe should include sufficient adjustable over-center quick clamps to join the aluminum flanged end pipe.

The vacuum hose will be mounted on a boom which will rotate a minimum 180 degrees and provide a full 90 degree rotation to each side of the unit.

The boom shall extend and retract a minimum of 8' and shall be located at the front work station in it's retracted position.

A boom extension and coverage diagram shall be provided.

yes

The boom shall include a true telescoping suction tube which will extend and retract without affecting the steel elbow or lower debris hose vertical position.

yes

To maintain a proper seal of the telescoping suction tube, a spring retained segmented air seal shall be provided.

yes

**Joystick Boom Control, toggle-type joystick control (up, down, right, left) mounted at operator station.**

**MANHOLE CLEANING WATER SYSTEM (Hand Gun)**

**DEVIATIONS**

The pump shall be of high pressure piston type that will deliver 10 GPM @ a maximum of 400 PSI @ 600 RPM. The pump shall be run by a hydraulic motor powered by auxiliary engine. A quick disconnect coupling shall be furnished with hose and pistol grip nozzle. Hose will be capable of delivering water to the area served by catch basin intake nozzle and to the inside of vacuum box for cleaning. Water tank shall be a minimum 500 gallons.

**Electrical**

The entire electrical system shall be vapor sealed to eliminate moisture damage. yes

All electrical connections shall require no exposed wires or terminals. yes

All light bulbs shall be shock mounted to eliminate bulb failure. yes

All wiring shall be color coded and run in sealed terminal boxes. yes

**MOUNTING**

Unit shall be mounted on existing W.P.C.M.D. - owned truck chassis at the factory of body manufacturer. yes

**COLOR**

Unit should be painted International Harvester #409 Yellow

# THE VACTOR 2100 SERIES

## THE NEWEST MOST INNOVATIVE DESIGNED VACTOR FROM PEABODY MYERS WITH THE BEST BACKED WARRANTY IN THE INDUSTRY!

**10 YEAR WARRANTY ON THE WATER TANK**
Against Corrosion or Rust Through

**5 YEAR WARRANTY ON THE DEBRIS TANK**
Against Corrosion or Rust Through

**5 YEAR WARRANTY ON THE CENTRIFUGAL COMPRESSOR AND HOUSING**

**1 FULL YEAR STANDARD VACTOR WARRANTY**

## THE BEST BUILT UNIT WITH THE BEST BACKED WARRANTY IN THE INDUSTRY!

Peabody Myers

# 2100 SERIES VACTOR WARRANTY

Peabody Myers (the "Seller") warrants to the Distributor and to the first Purchaser of Equipment for use, new Equipment to be free from defect in material and workmanship for 1 Year or 2000 operating hours, whichever occurs first, following date of delivery to the Purchaser.

Repair or replacement by Seller shall not extend the warranty period. This warranty may not be assigned by Purchaser.

Any parts of Seller's manufacture that are returned via prepaid transportation and are found to be defective will be repaired or replaced, at Seller's option, and returned transportation charges prepaid. It is expressly understood that Seller's liability is limited to furnishing such parts within a reasonable length of time. Seller will not be liable for any damages, losses or expenses arising in connection with the use of or inability to use Equipment.

This warranty covers only malfunctions resulting from defect in material or workmanship of Equipment, and parts and components thereof manufactured by Seller. Major components of Equipment not of Seller's manufacture including, but not limited to, power plants, hydraulics, trucks and transmissions, used by Seller as part of the Equipment, are not warranted by Seller (Seller hereby assigns to Purchaser any warranty extended by the manufacturer thereof).

It is the Purchaser's responsibility to use the Equipment for the purpose and in the manner described in the Operation Manual, and to assume any liability for damage or injury resulting from misuse and abuse, including the removal or alteration of safety guards and devices installed on the Equipment at time of delivery to Purchaser.

In addition to our standard warranty, Peabody Myers warrants the water tank on 2100 series Vactors for an additional 9 years against corrosion or rust through, making a total of 10 years warranty on water tanks.

The Debris Tank is warranted for an additional 4 years against corrosion or rust through for a total of 5 years warranty.

The Centrifugal Compressor and Housing is warranted for an additional 4 years for a total of 5 years warranty against rust through and compressor malfunction.

Used Equipment is sold "AS IS". Seller makes NO WARRANTY concerning its merchantability, condition, durability, age or model year, or fitness for any purpose whatsoever.

IT IS AGREED THAT THIS WARRANTY SETS FORTH PURCHASER'S EXCLUSIVE RIGHT AND REMEDY AGAINST SELLER WITH RESPECT TO THE EQUIPMENT. IT IS IN LIEU OF ALL OTHER EXPRESS WARRANTIES AND ALL IMPLIED WARRANTIES INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS. SELLER ASSUMES NO OTHER LIKE OR UNLIKE LIABILITY FOR LOSS OF USE, PROFIT, OR CONSEQUENTIAL DAMAGES OF ANY KIND OR NATURE, FROM WHATSOEVER CAUSE OR THING ARISING, INCLUDING, BUT NOT LIMITED TO, CLAIMS OF LIABILITY BASED UPON TORT, NEGLIGENCE, STRICT LIABILITY, OR BREACH OF WARRANTY IN CONNECTION WITH THE MANUFACTURE, SALE, ALTERATION, USE, REPAIR OR REPLACEMENT OF EQUIPMENT, OR ANY PART THEREOF.

EFFECTIVE 1-2-90

## Debris Body

The debris storage body shall be constructed of a minimum 3/16" corrosion and abrasion resis-tant steel with a minimum yield point of 50,000 PSI and a minimum tensile strength of 70,000 PSI.

The body shall be round for maximum strength andhave a minimum usable liquid capacity of 14 cubic yards or 2,800 gallons.

The body shall have a full size rear door that is hinged at the top and is equipped with a replaceable neoprene type seal to prevent leakage. This door shall be pneumatically opened and closed so operator is not subjected to sewage when dumping.

Debris body shall be dumped by raising the body to a 50 degree angle utilizing a forward mounted, double acting hydraulic dump cylinder.

To achieve best possible material separation and minimize material being discharged to atmosphere, the centrifugal compressor shall draw air from 2 separate ports in the debris body.

Dump controls and accessory controls shall be provided at a central curb side location directly behind the cab of the truck.

## Water Tanks

Water tank must be a certified metered capacity of 500 gallons. Certification may be necessary upon delivery.

The water tank shall be manufactured from non-corrosive, aluminum to prevent rust, yet still provide for maximum strength.

The water tank material shall require no internal coating and shall be repairable if patching is required.

The water tank shall be easily removed from the unit to provide complete access to the truck chassis for maintenance purposes.

The water tank shall be adequately vented and connected to provide complete filling.

The water tank shall be totally separate from the debris tanks and provide no structural support.

The water tank shall share no common walls with the debris tanks to prevent corrosion.

The water tank shall come equipped with and anti-syphon device and 25' of hydrant fill hose and fittings. A water level sight gauge shall also be provided.

# PEABODY MYERS VACTOR MODEL 2115CB DETAILED SPECIFICATIONS

The water tank shall carry a 10 year warranty against corrosion or cracking.

## Vacuum System

Vacuum shall be created by a minimum 38" diameter tapered aluminum centrifugal compressor. The compressor shall be manufactured out of aluminum for operator safety with hard chrome plated cast aluminum radial blades.

The aluminum centrifugal compressor shall be of the riveted type design, welded steel fans are not preferred due to safety considerations.

The centrifugal compressor shall be capable of air flows from 0 to 8000 CFMs and pressures from 0 to 114" negative water pressure.

The outer housing shall be manufactured out of a minimum 1/4" spun steel and carry a 5 year warranty.

For cleaning of drying beds, vacuuming leaves and debris along curbs, unit shall have capability of maintaining a full, constant vacuum while unit is in motion.

Unit shall also have ability to vacuum and jet rod to depths of 75 feet without use of any special attachments.

Compressor shall be able to vacuum wet or dry material without damaging vacuum system. Compressor shall also carry an unconditional 5 year warranty on the centrifugal compressor. Copy of warranty should be attached.

## Vacuum System Drive

The centrifugal compressor should be driven direct through a helical gear type step-up transmission drive with a step-up ratio of 1.4 to 1.

The 2 gears shall be lubricated with a splash lubrication system. The gear drive should attach directly to rotor shaft without use of multiple stage v-belts, sheaves or jack shafts.

The gear train should operate in an oil bath system at all times for added protection.

The compressor shall be engaged and disengaged from the auxiliary driving motor by a 10" heavy duty, industrial rated, overcenter type clutch with ferramic drive plates.

## Vacuum System Drive Engine

The shrouded auxiliary engine used to drive the vacuum system shall be a liquid cooled, diesel powered, turbo charged, 4 cylinder minimum, heavy duty industrial 4 cycle engine. The engine shall have a minimum displacement of 239 cubic inches and come equipped with high temperature, low oil pressure shutdown system as well as an exhaust silencer.

The auxiliary engine control panel shall be curb side and located directly behind the cab and be no more than 5 feet off the ground. The control panel shall consist of the following: engine, ignition, tachometer, water temp gauge, oil pressure gauge, voltmeter, hour meter.

The entire auxiliary vacuum engine shall be insulated in a noise deadening shroud to further decrease the operating noise level.

The noise deadening engine shroud shall be on roller tracts allowing the shroud to easily be pulled away from the engine providing complete engine access.

Heavy panels requiring manual removal shall not be acceptable.

8 Ft. Telescoping Hose

DEVIATIONS

## Vacuum System Pick-Up Hose

Shall be designed for front end operation with hose mounted and stored at front mounted work station. Front mounted location is desired for ease of positioning vacuum hose as well as minimizing need for operator to swing hose into traffic.

All connections between debris body and vacuum system will be of the self adjusting pressure fitting type.

Vacuum hose will remain stationary and not raise with debris body in order to minimize possibility of running vacuum hose into power lines and low hanging branches.

The upper debris tube shall consist of an anchored steel tube for additional life. The lift and swing movements shall be accomplished by cylinder actuated means. Gear type rotations are not preferred due to maintenance considerations.

The boom shall be operated by an electric over hydraulic system which draws its power from the auxiliary engine's hydraulic power source.

The boom shall be hydraulically driven up, down, left and right directions. Boom shall be controlled by a remote push button control station by cable to the hydraulic power swing and lift cylinders.

The control station shall come equipped with control switches for all directions as well as a safety emergency shut down button which automatically eliminates power to the boom.

A cab protection device independent of cab that will protect cab from boom will be provided.

Pipe extensions will be included to allow operator to clean to depths of 20 feet. This will include a 6'6" catch basin nozzle with a steel reinforced tip. Pipe should include sufficient adjustable over-center quick clamps to join the aluminum flanged end pipe.

The vacuum hose will be mounted on a boom which will rotate a minimum 180 degrees and provide 179" of reach off the center line of the unit.

## MANHOLE CLEANING WATER SYSTEM (Hand Gun)

The pump shall be of high pressure piston type that will deliver 10 GPM @ a maximum of 400 PSI @ 600 RPM. The pump shall be run by a hydraulic motor powered by auxiliary engine. A quick disconnect coupling shall be furnished with hose an d pistol gripnozzle. Hose will be capable of delivering water to the area served by catch basin intake nozzle and to the inside of vacuum box for cleaning. Water tank shall be a minimum 350 gallons.

## Electrical

The entire electrical system shall be vapor sealed to eliminate moisture damage.

All electrical connections shall require no exposed wires or terminals.

All light bulbs shall be shock mounted to eliminate bulb failure.

All wiring shall be color coded and run in sealed terminal boxes.

## Mounting

Unit will be mounted on approved truck chassis at the factory of body manufacturer.

## Optional Equipment

Revolving lights will be supplied on tailgate of unit and cab guard.

Read the first time in full and on motion by Burns, seconded by Edmonds, and duly adopted, read the second time by title and referred to the Committee on City Utilities (and the City Plan Commission for recommendation) and Public Hearing to be held after due legal notice, at the Council Conference Room 128, City-County Building, Fort Wayne, Indiana, on _____, the _____, day of _____, 19____, at _____ o'clock _____.M.,E.S.T.
